reliable.
SOFTWARE RESOURCES

Capability statement

Trusted people.
Dependable AI.

Who we are

Reliable Software Resources, Inc. places vetted technology talent and delivers AI agents, data, cloud and enterprise platform work for government agencies, prime contractors and enterprises. More than 250 Reliable people are on client engagements today, supported by 25+ hiring managers and recruiters. In business for more than 20 years.

Core competencies

Technology talent. Cleared and credentialed specialists and complete project delivery teams.

AI agents. Document, data, vision, knowledge and workflow agents, tested before launch, logged, with human approval where it matters.

Data and analytics. Pipelines, lakehouse and warehouse platforms, data quality and reporting on Databricks and Snowflake.

Cloud and modernization. Migration, legacy modernization, platform engineering and managed operations on AWS and Google Cloud.

Enterprise platforms. SAP S/4HANA, SAP BTP, integration and identity governance.

Platforms. Databricks, Snowflake, SAP, Google Cloud and AWS.

Differentiators

People and delivery from one contractor. Start with one specialist, grow to a team, or hand over the outcome.

Agents that do not improvise. Where an answer must be exact, the agent quotes the source and says so when the source is silent.

Vetted by people who have hired. Every candidate is screened by experienced hiring managers and recruiters before you see a name.

Certified. ISO/IEC 27001 for information security and ISO 9001 for quality. Work runs inside the customer environment.

Past performance

A major county in Virginia. Began by sourcing technology people for county teams; now implementing its data and AI landscape.

Heating and ventilation manufacturer. Knowledge agent that returns the exact passage from 50+ service manuals in 10 to 20 seconds; lookups previously took 30 to 40 minutes.

Global automotive parts supplier. Extracted engineering drawings and supplier history from SAP and built an agent that finds comparable, pre-approved parts for procurement.
